#### ***Computer Programmer/Designer/Video Editor/Server Kicker***

06 / 2010 - 08 / 2010

Code client websites, plan, shoot, and edit video, maintain server equipment and software.

## **Education**

### **HAMPSHIRE COLLEGE**

#### ***Design & Technology for the 21st Century Stage***

2011 - 2015

At Hampshire College I studied both Design & Technology for Live Entertainment and Computer Sciences. I concentrated on integrating the two fields, and studying how modern technology that is common in Computer Sciences and consumer technology products could be applied to live entertainment. My thesis involved design and technical building of several shows, as well as the development of a webapp to provide a easy-to-use and accessible toolkit for lighting designers to digitally track paperwork and easily share it with the lighting team of a production.
